# B.Tech Mini Project – Schedule & Review Guidelines

## 1. Mini Project Schedule (Suggested Timeline)

### Phase–1: Project Selection & Problem Definition (Week 1–2)

- Identify domain
- Finalize project title.
- Define problem statement.
- Conduct brief literature survey.
- Finalize required hardware/software/tools.

**Deliverables:**

- Project abstract (1–2 pages)
- Problem statement
- Proposed methodology

### Phase–2: System Study & Design (Week 3–4)

- Collect related research papers/materials.
- Prepare system architecture.
- Identify modules and data flow.
- Decide algorithms/technologies to be used.

**Deliverables:**

- System design diagrams:
  - DFD / UML / Block diagram / Architecture diagram
- Module description
- Gantt chart (activity plan)

### Phase–3: Implementation (Week 5 7)

- Start coding or hardware assembly.
- Develop individual modules.
- Integrate modules.
- Conduct unit testing.

**Deliverables:**

- Working modules
- Code snippets
- Test cases

### Phase–4: Testing & Documentation (Week 8)

- Perform system testing.
- Fix bugs.
- Prepare project report (as per college format).
- Prepare PPT for review.

**Deliverables:**

- Working prototype
- Project report draft
- PPT for final review

### Phase–5: Final Review & Submission (Week 9–10)

- Demonstration of working project.
- Viva presentation.
- Submission of:
  - Project report
  - PPT
  - GitHub link / Source code
  - Screenshots / Output results

# 2. Review Preparation Guidelines

## Review–1 (Abstract & Design Review)-

## 8th January

**Students should submit:**

- Abstract
- Problem definition
- Literature survey summary
- System architecture
- Module-wise plan
- Tools required

**Review panel checks:**

- Relevance and originality of the problem
- Clarity of objectives
- Feasibility in given time
- Basic understanding of technologies

## Review–2 (Progress Review)-

## 2nd March

**Students should present:**

- Implementation status
- Completed modules
- Partial output screenshots
- Challenges faced
- Updated Gantt chart

**Review panel checks:**

- Actual progress vs planned progress
- Quality of work done
- Problem-solving ability
- Team coordination

## Review–3 (Final Review) - 10th April

**Students should present:**

- Full working demonstration
- Final outputs
- Comparison with existing systems
- Conclusion & future scope

**Review panel checks:**

- Completeness of project
- Working functionality
- Technical understanding
- Quality of documentation
- Viva performance

# 3. General Guidelines for Mini Projects

### Project Selection

- Choose simple, feasible, and practical topics.
- Avoid unrealistic or oversized projects.
- Prefer solutions for real-life local problems.

### Team Guidelines

- Typically 2–5 students per team.
- Assign roles:
  - Developer
  - Designer
  - Tester
  - Documentation lead

### Documentation Guidelines

Project report must include:

1. Title page
2. Certificate
3. Abstract
4. Introduction
5. Literature survey
6. System design
7. Methodology
8. Implementation
9. Results
10. Conclusion & Future scope
11. References

### PPT Guidelines

- 10–12 slides only
- Clear diagrams
- Minimal text
- Flow:
  - Title → Problem → Design → Implementation → Results → Conclusion

### Presentation Guidelines

- Speak clearly and confidently
- Explain your contribution
- Show working demo live
- Keep backup video demo
